Space & Naval Warfare Systems Center Awards Contract

CHARLESTON, S.C. -- Tracor Systems Technologies, Inc., of Rockville, Md. has been awarded a \$13,999,137 cost-plus-fixed-fee, indefinite delivery, indefinite quantity contract for engineering development, design, procurement, fabrication, configuration, installation and integration, logistics, maintenance, and other life cycle support for the Navy's Physical, Electronic, and Computer Sensor Systems (PECSS) program. The PECSS programs include: surveillance and detection systems, supervisory control and data acquisition applications, electronic security and sensor systems, information systems security, and command, control, communications, computer, and intelligence (C⁴I) systems and equipment. This contract contains four one-year options, which, if exercised, will bring the total cumulative value to \$90,392,936. Work will be performed within the geographic boundaries of the United States, including Alaska and Hawaii, and at various DOD, Federal, State, and Local Government installations world-wide. Contract funding is from multiple sources. This contract was competitively procured with 114 offers solicited and four offers received. The Space and Naval Warfare Systems Center Charleston is the contract awarding activity (N65236-98-D-7812).
